

ArcadeHub Nexus - Full-Stack Assets and Style Guide

This document defines the visual direction, technical stack, data model, API scope, and content boundaries for the full-stack online gaming website task.

1. Brand Concept

ArcadeHub Nexus is a fictional online gaming website for free casual browser games. Users can sign up, log in, browse games, save favorites, submit demo scores, and view leaderboard rankings. The platform must feel like a gaming portal, not a casino, gambling, betting, or real-money reward product.

2. Reference Image

File	Purpose	Usage Rule
reference_image.png	Main PNG reference	Use for the dark neon arcade style, game cards, Play buttons, daily quest, leaderboard, player hub, and gaming portal layout direction.

3. Gaming Visual Direction

- Use fictional casual game cards with Play actions.
- Use arcade categories such as Arcade, Racing, Puzzle, and Reflex.
- Use gaming motifs such as controller icons, rockets, karts, puzzles, targets, badges, quests, and leaderboards.
- Do not use poker chips, slot machines, playing cards, roulette wheels, betting odds, cash, or casino tables.
- Keep the design dark, neon, smooth, readable, and youth-safe.

4. Required Stack
